Drawing

(57)Abstract

Disclosed is a throttle valve (1) having a housing (2) comprising an inlet opening (3) for a fluid, a rotatable shaft (13), and a piston (16), which is axially movable within the housing (2). The axial movement of the piston (16) a throttle cross section of the throttle (4) can be adjusted. For large pipe cross-sections the throttle valve according to the invention is improved, so that the axial movement of the piston (16) a throttle cross section of the throttle (4) can be adjusted. For large pipe cross-sections the throttle valve according to the invention is improved, so that the axial movement of the piston (16) a throttle cross section of the throttle (4) can be adjusted. For large pipe cross-sections the throttle valve according to the invention is improved, so that the axial movement of the piston (16) a throttle cross section of the throttle (4) can be adjusted.

**Examiners First Report**

Dear Sir/Madam,

We have examined the above mentioned application, and our report follows:

«action\_notes1»

«action\_options»

The report explains the matters which at present prevent your mark from being accepted for registration. If there are any parts of it which you would like us to clarify, please contact this office as indicated above.

To continue with your application you should read our report and respond in writing to the points we have raised. We will consider your reply and if all these points have been resolved then we will recommend that your application be accepted for registration. If there are any points which have not been resolved we will send you a further report.

The Trade Marks Act gives you 6 months from the date on this report in which to overcome the examiner's objections to your application. If your application is not in order by that time you will be sent a reminder notice and given another three months in which to respond. However, unless you apply and pay the prescribed fee for further extensions of time, your application will then lapse.

Yours faithfully,

*Signature*

# More Features

- Processing Renewals of trademarks and industrial designs
- Processing assignments, merger, change of name and/or address, etc...etc.
- Annuities generation and payment tracking
- Journals/Gazettes preparation
- Pre-Filing Search
- Dossier Tracking
- Productivity Report
- Yearly Statistic Report
- Linkage with electronic document management system

# Key Technologies in IPAS

- JavaEE
- Oracle/Microsoft SQL Server

# Integration with Other Systems

- is made possible by IPAS API and IPAS Web Service

# IPAS

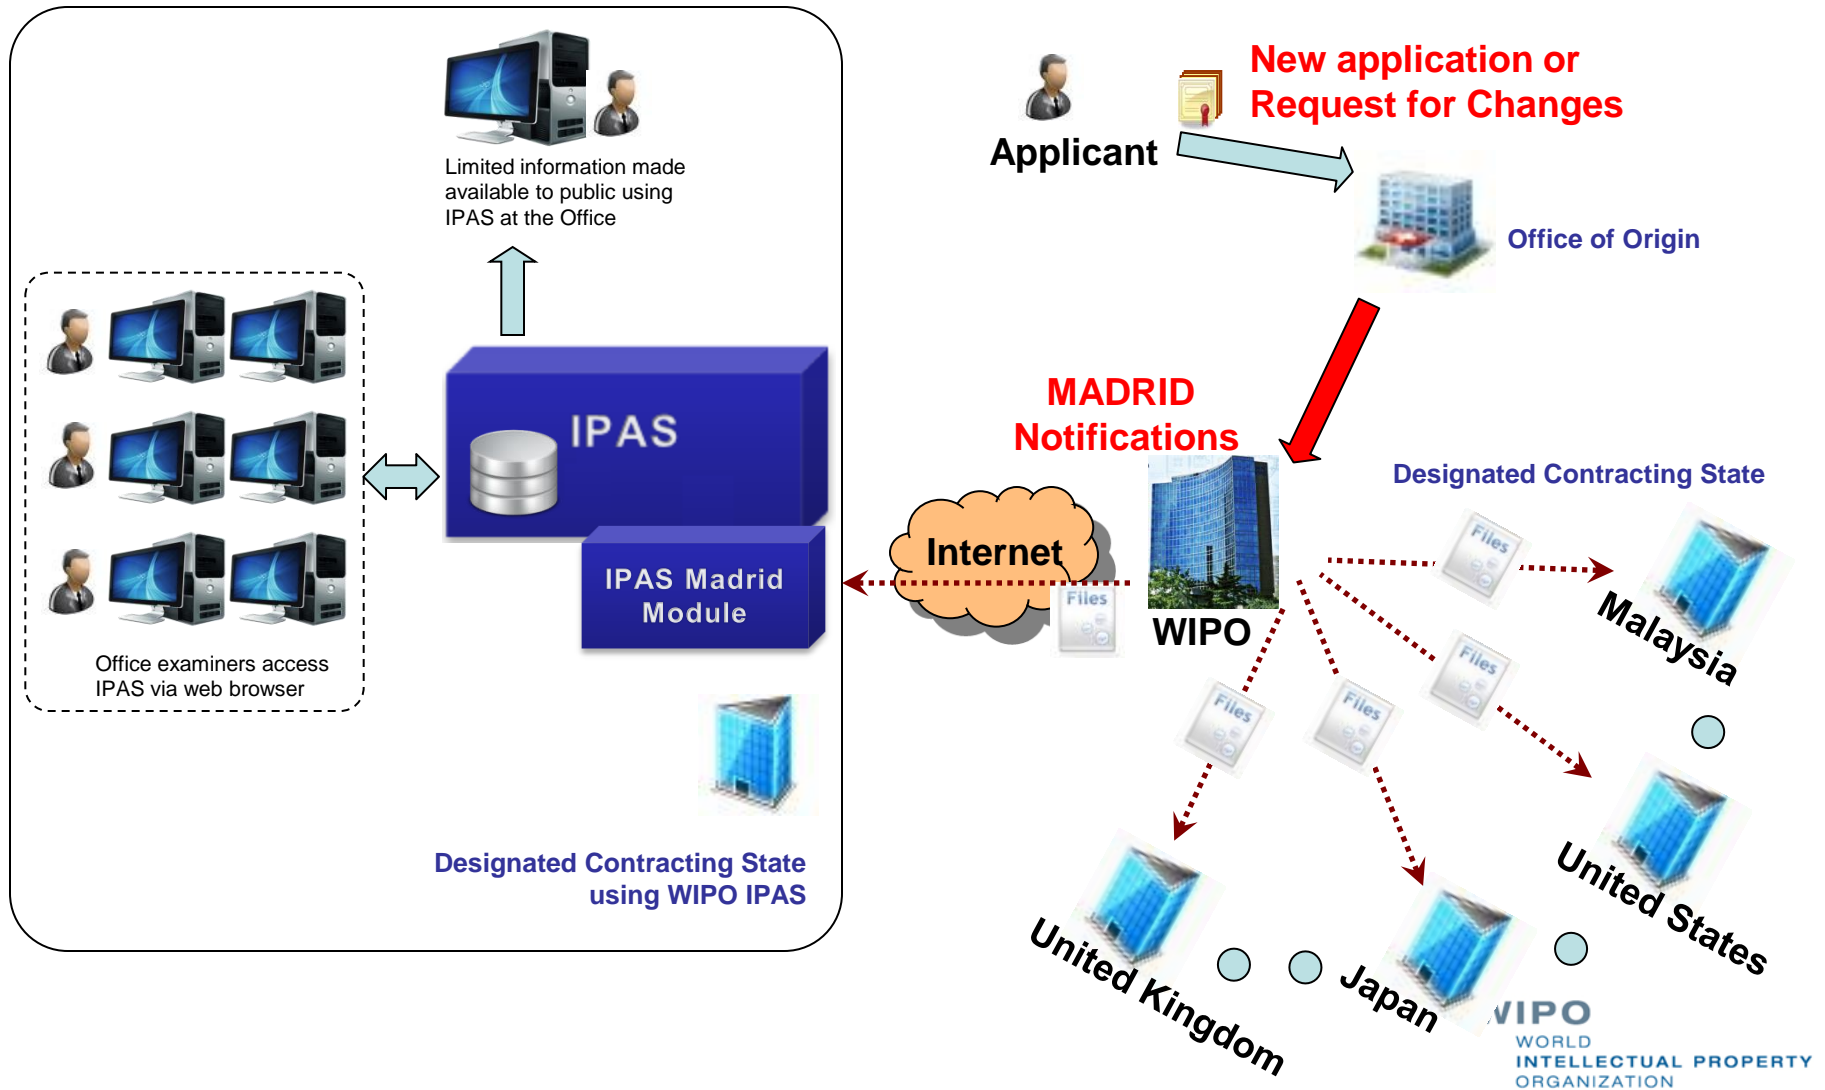

- Extensive customization including:
  - National IP legislation,
  - Workflow processes, legal time-periods and deadlines,
  - Templates of official correspondences, certificates, gazettes,
  - Language, terminology
  
- No programming is required to customize IPAS

# IPAS Madrid Module

- Optional module of IPAS to process Madrid notifications

# IPAS Madrid Module

# Madrid Notification

## IP Office Support

Created by DB Admin, last modified by Gabriel BERLICKI on Mar 13, 2014

This wiki space is intended to provide up to date information relating to WIPO systems that are developed for and deployed in national Intellectual Property Offices. The wiki space contains documentation on the different products, as well as specifications for new features and, for authorized users, the software repository installation and change documentation.
