Notification of Reasons for Refusal

Application number: Heisei 11(1999) Request for a Patent
Date of Drafting: Heisei 15(2003) November 11
Patent examiner: KURIYAMA, Takuya 9628 3K00
Representative/Applicant: SHIRAHAMA, Yoshiharu
Applied Provisions: Article 29(2)

Clause of the patent law applied by examiners

This application should be refused for the reason mentioned below. If the applicant has an argument against the reason, such argument should be submitted within 60 days from the date on which this notification was dispatched.

Reason

The claimed invention(s) in the each claim listed below of this patent application should not be granted a patent under the provision of Patent Law Article 29 (2) for the reason that the claimed invention(s) could have easily been made by persons who have common knowledge in the technical field to which the claimed invention(s) pertains, on the basis of the invention(s) described in the distributed publication(s) listed below in Japan or other foreign countries prior to the filing of the patent application.

Note (See the list of cited documents etc., below.)

[- Claim: 1 - Cited Documents: 1 and 2 Remarks cited document 1] It consists of synthetic resin continuous glass fiber of many hot welding nature which, and is extended to one way, [of hot welding nature] [a plastic sheet and] [the] The disposable dirt wiping tools joined to the sheet with the welding line of two or more sections which continuous glass fiber extended in the direction which intersects one way, and is arranged intermittently to one way are described, and the sheath-core type conjugate fiber whose melting temperature of a sheath is lower than that of a core 30 degrees C or more is described in cited document 2. It is admitted that it is easy for a person skilled in the art to make the invention in this application from the thing of above-mentioned document 1 and 2.

- Claim: 2 - Cited Documents: 1 and 2

Remarks

The sheath-core type conjugate fiber whose melting temperature of a sheath is lower than that of a core 70 degrees C or more is described in cited document 2. It is admitted that it is easy for a person skilled in the art to make the invention in this application from cited document 1 and the thing of 2.

Notification of Reasons for Refusal

Reason why examiners think it unpatentable

Exercise 3: Translate the text to your familiar language

Disclaimer:

Translation from English to other languages is performed by GoogleTranslate function. Since this function is based on machine translation, the translation result might be inaccurate. The JPO and the INPIT are not responsible for any damage that may be caused by the use of this function or the translation result.

Penolakan:

Pemberitahuan Alasan Penolakan

Nomor aplikasi: Heisei 11 (1999) Permintaan Paten No. 105956
Tanggal Drafting: Heisei 15 (2003) November 11
pemeriksa Paten: Kuriyama, Takuya 9628 3K00
Perwakilan / Pemohon: Shirahama, Yoshiharu
Ketentuan Terapan: Pasal 29 (2)

ini aplikasi harus ditolak karena alasan yang disebutkan di bawah. Jika pemohon memiliki argumen terhadap alasan, dalil tersebut harus diserahkan dalam waktu 60 hari dari tanggal pemberitahuan ini dikirim.

Alasan

Penemuan mengklaim (s) di setiap klaim yang tercantum di bawah aplikasi paten ini tidak boleh diberikan paten berdasarkan ketentuan UU Paten Pasal 29 (2) dengan alasan bahwa penemuan diklaim (s) bisa dengan mudah dilakukan oleh orang yang memiliki pengetahuan umum di bidang teknis yang penemuan diklaim (s) berkaitan, atas dasar penemuan (s) digambarkan dalam publikasi didistribusikan (s) yang tercantum di bawah di Jepang atau negara asing lainnya sebelum pengajuan paten aplikasi.

Catatan (Lihat daftar dokumen yang dikutip dll, di bawah ini.)

[- Klaim: 1 - Dikutip Dokumen: 1 dan 2 Keterangan dikutip dokumen 1] Ini terdiri dari resin sintesis fiber glass terus menerus dari banyak alam pengelasan panas yang, dan diperpanjang untuk satu arah, [alam pengelasan hot] [selembar plastik dan] [yang] kotoran pakai menyeka alat bergabung ke lembar dengan garis las dari dua atau lebih bagian yang fiber glass terus menerus diperpanjang ke arah yang memotong salah satu cara, dan diatur sebentar-sebentar ke salah satu cara yang dijelaskan, dan selubung-core Jenis

(54) DISPOSABLE WIRING TOOL

(57)Abstract:

PROBLEM TO BE SOLVED: To prevent fibers of a disposable wiping tool from coming off.

SOLUTION: This disposable wiping tool 1 is comprises a sheet part 10 and a lot of thermal melt-stuck long fibers 25 extended in one direction while being bonded onto one side 10A or 10B of the sheet at least, and a lot of long fibers 25 are bonded onto the sheet part 10 by plural melt-sticking wires 9 extended across the fibers and intermittently arranged in the lengthwise direction of long fibers.

CLAIM + DETAILED DESCRIPTION

[Claim(s)]

[Claim 1] They are the disposable wiping tools consisting of many hot welding continuous glass fiber which is joined to a hot welding sheet and the sheet, and is extended unidirectionally. The aforementioned wiping tools having joined to the aforementioned sheet with a plurality of welding lines which the aforementioned continuous glass fiber extended in the direction which intersects this, and were intermittently arranged by longitudinal direction of the continuous glass fiber.

[Claim 2] The wiping tools according to claim 1 which are a plurality of coil gland which the aforementioned welding line intersects the aforementioned continuous glass fiber aslant substantially, and is mutually parallel.

[Claim 3] The wiping tools according to claim 1 whose aforementioned welding lines are a plurality of parallel straight lines which cross the aforementioned continuous glass fiber and aslant.

[Claim 4] The wiping tools according to claim 3 which the aforementioned welding lines are a plurality of straight lines which cross the aforementioned continuous glass fiber and aslant, and these straight lines cross mutually, and are presenting a lattice pattern as a whole.

[Claim 5] The wiping tools according to claim 1 whose aforementioned hot welding sheets are either a plastic film and a nonwoven fabric.

[Claim 6] The wiping tools according to claim 1 with which said many continuous glass fiber opens a tow of a hot welding continuous filament.

[Detailed Description of the Invention]

[0001]

[Field of the Invention] This invention relates to the wiping tools of throwing away used in order to clean a floor etc.
