Lessons learned from API based Data exchange implementation

Introduction

- Context: data exchanges
- Benefits & Challenges
- Business case: EPO & FI implementation

Benefits & Challenges

- Real time data interaction
 - Avoiding large volume download (batch)
 - Schedule flexibility (24/7)
- Transfer to multiple receivers
- Reliable recovery, even weeks after failure for data exchanges
- Immediate data quality feedback
- Ability to propose services (validation, priority check)
- Machine to machine interaction

- Implementation within existing back-office
- Monitoring necessity

Business case: EPO & FI (PRH) implementation
