

SECTION IV

NOTICES AND INFORMATION OF A GENERAL CHARACTER

NATIONAL AND REGIONAL OFFICES

Means of Receipt of Documents

The **Japanese Patent Office** has notified the International Bureau that it is prepared to receive documents referred to in PCT Rule 92.4 by means of telecopier as from January 4, 1985. The number of the telecopier is (03)501-6803 (groups 2 and 3).

RECEIVING OFFICES

Competent International Preliminary Examining Authorities

Pursuant to information received from the **National Office of Inventions of Hungary**, the **Austrian Patent Office** is, with effect from November 14, 1984, at the choice of the applicant, a competent International Preliminary Examining Authority in respect of international applications filed with the National Office of Inventions for the Grant of European patents.

DESIGNATED (OR ELECTED) OFFICES

Time Limit under PCT Article 39(1)(a)

The modified time limit of 30 months from the priority date under Article 39(1)(a) applies for the procedure before the national Office of **Sweden** as an elected Office as from January 1, 1985. The notice published in PCT Gazette No. 25/1984, on page 3098, is hereby amended. Therefore, the time limit of 25 months from the priority date continues to apply, after January 1, 1985, under Article 39(1)(a) only with respect to the national Offices of Finland, Japan (only for the payment of the national fee; for the other acts referred to in Article 39(1)(a), the time limit applicable under Article 22 continues to apply) and the United Kingdom.

SECTION IV

NOTICES AND INFORMATION OF A GENERAL CHARACTER

CONTRACTING STATES

States Party to the Patent Cooperation Treaty (PCT)

On December 12, 1984, **Barbados** deposited its instrument of accession to the Patent Cooperation Treaty (PCT). Thus, Barbados will become the 38th Contracting State of the PCT on March 12, 1985.

Consequently, as from March 12, 1985, nationals and residents of Barbados will become entitled to file international applications under the PCT and, from the same date, it will be possible to file international applications designating Barbados.

On December 28, 1984, **Italy** deposited its instrument of ratification of the Patent Cooperation Treaty (PCT). Thus, Italy will become the 39th Contracting State of the PCT on March 28, 1985.

Consequently, as from March 28, 1985, nationals and residents of Italy will become entitled to file international applications under the PCT and, from the same date, it will be possible to file international applications designating Italy.

The designation of Italy in an international application will have the effect of an indication of the wish to obtain a European patent for Italy under the European Patent Convention (PCT Article 45(2)); a **national** Italian patent cannot be obtained through an international application under the PCT.

The entry into force of the PCT for Italy has the consequence that, as from March 28, 1985, all States party to the European Patent Convention (Austria, Belgium, France, Germany (Federal Republic of), Italy, Liechtenstein, Luxembourg, the Netherlands, Sweden, Switzerland and the United Kingdom) will also be party to the PCT. This opens the possibility of obtaining, by filing a single international application under the PCT, a European patent for all those States.

DESIGNATED (OR ELECTED) OFFICES

The International Bureau has, by January 15, 1985, received notifications under PCT Rule 49.1(a-bis) from the following Contracting States: **Bulgaria, Hungary, Republic of Korea, Sudan and Switzerland**. Under those notifications, the above-mentioned Contracting States do not require the furnishing, under Article 22, by the applicant of a copy of the international application (even though the communication of the copy of the international application by the International Bureau under Rule 47 has not taken place by the expiration of the applicable time limit under Article 22). Pursuant to Rule 76.5, those notifications are also applicable for the furnishing of a copy of the international application under Article 39(1) for those of the said States which are bound by Chapter II, namely, Bulgaria, Hungary and Sudan.

INTERNATIONAL BUREAU

Non-Working Days

For the purpose of computing time limits under Rule 80.5* the days on which the International Bureau is **not open for business** are, for the period from February 1, 1985 to February 1, 1986, the following:

all Saturdays and Sundays and
April 5, 1985
April 8, 1985
May 16, 1985
May 27, 1985
September 5, 1985
December 25 and 26, 1985
January 1 and 2, 1986

It is important to note that the days indicated above concern **only the International Bureau** and not the national Offices and other international organizations.

* Rule 80.5 *Expiration on a Non-Working Day*

“If the expiration of any period during which any document or fee must reach a national Office or intergovernmental organization falls on a day on which such Office or organization is not open to the public for the purposes of the transaction of official business, or on which ordinary mail is not delivered in the locality in which such Office or organization is situated, the period shall expire on the next subsequent day on which neither of the said two circumstances exists.”

STATISTICS RELATING TO RECORD COPIES RECEIVED BY THE INTERNATIONAL BUREAU

GUIDANCE NOTE CONCERNING STATISTICS

Certain codes are used in the statistical tables to indicate the identity of receiving Offices and of designated States. These codes have been taken from the "Code for Identifying States and Organizations" contained in Annex B* to the Administrative Instructions under the Patent Cooperation Treaty (PCT). The codes and the States to which they refer are set out at the foot of this note.

In the case of receiving Offices, the codes indicate the Contracting State of the Patent Cooperation Treaty (PCT) for which the receiving Office is the national industrial property office except in the case of the European Patent Office which acts (as well as the national industrial property office) as receiving Office for the Contracting States of the PCT which are also party to the European Patent Convention. In the statistical table relating to the designations of States, the figures shown relate to the indications as to designations contained in the record copies as received by the International Bureau of WIPO and notified by it to the designated Offices. Against the code of each designated State, the abbreviations "NAT" and/or "EPO" and/or "OAPI" are indicated. These abbreviations mean that, for the designated State, a national patent ("NAT") and/or a European patent ("EPO") and/or a patent granted by the African Intellectual Property Office ("OAPI") is sought.

May Italy be elected?	Yes (bound by Chapter II of the PCT)
Types of protection available:	European patents
Provisions of the Italian law concerning international-type search:	None
Provisional protection pursuant to international publication:	European protection only: After international publication or, where that publication was in a language other than one of the official languages of the EPO, after publication by the EPO of the international application in a translation into one of its official languages furnished to it, the applicant may, as from the date on which a translation into Italian of the claims is made available to the public or communicated to the user, obtain damages and possibly the description and seizure of the articles infringing the patent and anything used in the making thereof.

* However, a resident of Italy may only file direct at the European Patent Office with the authorization of the Ministry for Industry, Commerce and Handicraft, except if the international application claims the priority of a national application filed in Italy over 90 days previously and such application has not been made subject to the official secrets regulation.

LEGAL DECISIONS

European Patent Office

Decision of the Legal Board of Appeal of 25 September 1984, J 06/1983* (published in the Official Journal of the European Patent Office No. 4/1985, pages 97 to 101)

Headword: "Refund of Examination Fee (PCT)/CATERPILLAR"

EPC Articles 17, 18(1), 92, 94(1)(2), 157, Rules relating to Fees Article 10, PCT Articles 23, 40

"Reimbursement of the examination fee"—"withdrawal of application"

Headnote

If an international application which is deemed to be a European patent application in accordance with Article 150 (3) EPC is withdrawn before the drawing up of the supplementary European search report can be begun, examination of the application is precluded. In such circumstances, if the examination fee has already been paid, it must be refunded.

Summary of Facts and Submissions

I. On 13 August 1979, the appellant filed an international application under the Patent Cooperation Treaty (PCT) in the United States of America. No claim was made to a priority date earlier than the date of the application. The European Patent Office was the designated office for the purposes of the PCT, as several EPC Contracting States were designated, it being indicated that it was desired to obtain a European patent for those States. The application thus being deemed to be a European patent application (Article 150 (3) EPC) was accorded the number 79901397.4.

II. The appellant filed a request for examination of the European patent application on 8 January 1981. The examination fee was paid on 23 January 1981. The international search report was published on 19 February 1981.

III. By letter dated 1 June 1981, received on 3 June 1981, the appellant requested withdrawal of the European patent application, the refund of the search fee in respect of the supplementary European search report and the refund of the examination fee. As the EPO had not begun to draw up the supplementary European search report, the search fee was duly refunded in accordance with Article 10 (4), Rules relating to Fees. The EPO did not refund the examination fee and after correspondence between the

appellant's representative and the EPO and reference of the matter to the EPO's Legal Division, the refusal to refund the examination fee was made the subject of the decision under appeal, dated 18 April 1983.

IV. In the decision it was held that:

(1) In accordance with Article 22 (1) PCT, the regional phase of processing the application had commenced on 14 April 1981, i.e. at the expiration of 20 months from the priority date.

(2) The request for examination and payment of the examination fee had had immediate effect, by virtue of the provisions of Article 150 (3) EPC and Articles 11 (3) and 11 (4) PCT.

(3) Fees due under the EPC are as a general rule refunded only if there is express provision for such a refund.

(4) Under a practice of the EPO (cf. Legal Advice No. 1/79 Official Journal EPO, 1979, p. 61) a refund of the examination fee will occur if processing of a European patent application is terminated before responsibility for it is transferred from the Receiving Section to the Examining Division. However, this practice could not be applied to an international application because, under Articles 23 (1) and 40 (1) PCT, the EPO may neither process nor examine the international application before the start of the regional phase. The Examining Division always assumes responsibility for an international application from the moment when the request for examination is filed, even though it cannot process or examine the application before the start of the regional phase.

(5) It follows that an examination fee paid during the international phase can only be refunded if the application is withdrawn before the start of the regional phase. This was not the case with the present application.

V. By telex, on 17 June 1983, duly confirmed by letter dated 20 June 1983, the appellant gave notice of appeal against the decision. The appeal fee was duly paid. In the notice of appeal, the appellant requested full refund of the examination fee and reimbursement of the appeal fee. Reference of the case to the Enlarged Board of Appeal was also requested.

VI. In the Statement of Grounds of the Appeal, filed on 17 August 1983, the appellant contended that:

(1) The supplementary European search report is the definitive search report for the purposes of examination;

(2) Not only is it convenient to pay the examination fee earlier than necessary but it is also frequently impracticable to wait until the supplementary search report is received before paying the fee;

(3) The applicant could not have known at any material time that the Examining Division assumed responsibility for the application immediately the request for examination became effective since the matter was the subject of an amendment to the Guidelines for Examination not published until October 1981. Furthermore, in fact, action had been taken in the case by the Receiving Section and the Search Division;

* Official text.

(4) It was absurd and illogical to refund the supplementary search fee and not the examination fee, since examination must follow search.

The appellant repeated the request that the matter be referred to the Enlarged Board of Appeal.

VII. By a communication dated 17 July 1984, the Legal Board of Appeal indicated that it was able to envisage giving a positive decision in the present case, on the basis that where the fee for the supplementary European search can be refunded because the EPO has not begun to draw up the supplementary European search report, the examination fee can also be refunded. However, as there were other cases pending before the Board in which the question arose of refunding examination fees after the supplementary European search report had been drawn up and the arguments in those cases might conceivably affect the Board's view of the present case, the Board would not decide the present case immediately unless the appellant asked for that. By letter dated 1 August 1984, the appellant's representative asked for an immediate decision.

Reasons for the Decision

1. The appeal complies with Articles 106-108 and Rule 64 EPC and is, therefore, admissible.
2. The question of the refund of the examination fee in the case of withdrawal of an international application after receipt of the supplementary European search report is one which is recognised as giving rise to legal difficulty and, as it is the subject of other appeals pending before the Legal Board of Appeal, it is not a question which will be examined in the present decision.
3. It is possible to decide the present case without prejudging the issues which arise in those other cases, since it turns on a different point.
4. There is an inherent illogicality in a situation in which, as a result of withdrawal of an international application, it is lawful to refund the fee for a supplementary European search, in accordance with Article 10 (4) Rules relating to Fees, but allegedly not lawful to refund the fee for a substantive examination which can never take place.
5. Now it is a well-established principle of interpretation of treaties that one should, if possible, avoid an interpretation which leads to a result which is manifestly absurd or unreasonable in the light of the objects and purposes of the treaty in question. It is undoubtedly for this reason that Article 32 of the Vienna Convention on the Law of

Treaties (cf. Official Journal EPO 1984, at p. 196) permits recourse to supplementary means of interpretation, including preliminary documents, to avoid manifest absurdity or unreasonableness.

6. The Board therefore considers it necessary to examine whether there is any justification in any provision of the EPC, the Implementing Regulations or the Rules relating to Fees for refusing to refund the examination fee in the circumstances of the present case. The provision that a request for examination cannot be withdrawn (Article 94 (2) EPC) clearly does not have the effect that if an application is withdrawn the examination fee paid cannot be repaid: Legal Advice No. 1/79 (*ubi supra*: para IV (4)) could not have been given, if that were so. There is no other provision of the EPC, the Implementing Regulations or the Rules relating to Fees which even implies that an examination fee cannot be refunded if the examination cannot take place.

7. What is suggested in the decision under appeal is that an examination fee paid during the international phase of an international application can be repaid if the application is withdrawn during that phase, because the EPO is precluded from examining the application during that phase by the express provisions of Articles 23 and 40 PCT.

8. The question which arises in the present case is whether the EPO is not also precluded from examining an application under Article 94 (1) EPC when the regional phase has begun, if no supplementary European search report can be drawn up in accordance with Article 157 (2) (a) EPC, because the application has been withdrawn? If it is, then by parity of reasoning with the considerations mentioned in the previous paragraph, the examination fee must be repayable.

9. A supplementary European search report is clearly a "European search report" within the meaning of the EPC. (If this were not so, one consequence would be that the fee paid for such a search could not lawfully be refunded in accordance with Article 10 (4) Rules relating to Fees). No special provisions of the Convention or the Implementing Regulations apply to a supplementary report. It follows that Articles 17 and 92 EPC apply to the drawing up of a supplementary European search report: i.e. that the Search Division alone, not the Examining Division, is responsible for drawing it up and sending it to the applicant. The consideration that at that point in time the Examining Division may be responsible for any examination of the application, in accordance with Article 18 (1) EPC, cannot have the effect

of authorising the Examining Division to commence examination, if a supplementary European search report — which is obligatory (Article 157 (2) (a) EPC) — is never going to be made. It follows that if the application is withdrawn before the drawing up of the supplementary European search report can be begun, examination of the application is precluded. In these circumstances, the examination fee is repayable. Reasoning in this way avoids the illogicality referred to in paragraph 4 above.

10. The decision under appeal failed to consider the relevant circumstances of the present case and erred in holding that an examination fee paid during the international phase can "only" be refunded if the application is withdrawn before the start of the regional phase. Accordingly, the decision must be set aside.

11. Since the questions of law arising in this case can be answered clearly by reference to the applicable provisions of the PCT, the EPC and the Rules relating to Fees, the Legal Board of Appeal finds no reason to refer any question to the Enlarged Board of Appeal.

12. Since no substantial procedural violation appears to have taken place, there is no ground for ordering reimbursement of the appeal fee.

ORDER

For these reasons,
it is decided that:

1. The decision of the Formalities Section of Directorate-General 2 dated 18 April 1983 is set aside.
2. The examination fee paid in respect of European patent application No. 79901397.4 shall be refunded in full to the appellant.
3. The request that a question or questions of law should be referred to the Enlarged Board of Appeal is refused.
4. The request for reimbursement of the appeal fee is refused.

"Invitation by the EPO"—"Refund of examination fee"

Headnote

I. If a supplementary European search report has to be drawn up in respect of an international application which is deemed to be a European patent application, the applicant is entitled to receive the invitations provided for in Article 96 (1) EPC and Rule 51 (1) EPC.

II. Since in the case of such an international application, responsibility for examination of the application does not pass to the Examining Division until the applicant has indicated under Article 96 (1) EPC that he desires to proceed further with his application, the applicant may obtain a refund of the examination fee if in response to the invitation under Article 96 (1) EPC he withdraws his application, or allows it to be deemed to be withdrawn.

Summary of Facts and Submissions

I. On 28 July 1980, the appellant filed an international application under the Patent Cooperation Treaty (PCT) in the United States of America, claiming priority from a U.S. national patent application filed on 30 August 1979. The European Patent Office was a designated Office for the purposes of the PCT, as three EPC Contracting States were designated, it being indicated that it was desired to obtain a European patent for those States. The application was allotted the European patent application number 80901737.9.

II. The international search report was transmitted to the appellant by the United States PCT International Searching Authority on 30 October 1980. In December 1980, the appellant filed amended claims with the International Bureau. The international application was published with the amended claims and the international search report on 5 March 1981. Having paid the national fees on 21 April 1981 and the examination fee on 6 August 1981, the appellant filed a request for examination with the European Patent Office in due time on 11 August 1981.

III. The supplementary European search report was transmitted to the appellant's representative on 16 February 1982. By letter dated 22 April 1982, the representative informed the European Patent Office that the applicant did not wish to proceed further with the application and that it was thereby withdrawn. In reliance on the reasoning of Legal Advice No. 1/1979 (OJ EPO 1979, 61), a refund of the examination fee was claimed.

IV. By a communication dated 20 May 1982, a Formalities Officer of Directorate-General 2 advised the appellant's representative that no refund of the examination fee was possible and that, if the appellant disagreed with this finding, a decision might be requested under Rule 69 (2) EPC.

V. By letter dated 5 July 1982, the appellant's representative duly requested such a decision. It was submitted that the supplementary European search report was part of the European search report for the purposes of Article 96 (1) EPC.

The transmittal of the supplementary European search report was the relevant act for the purposes of Article 96 (1) EPC and the appellant had been denied the opportunity to claim the benefit of a refund of the examination fee in accordance with Legal Advice No. 1/1979 as no invitation under that Article had been sent.

VI. The Decision under appeal, given on 18 April 1983, refused the request for a refund of the examination fee on the ground that an applicant for an international application which was deemed to be a European patent application (a "Euro-PCT application") had the right to a refund only if the application was withdrawn before the start of the regional phase, prior to which, in accordance with Articles 23 (1) and 40 (1) PCT, the EPO was forbidden to process or examine the application.

VII. By letter dated 8 June 1983, the appellant gave notice of appeal against the Decision, appealing against the whole of the decision and requesting that it be reversed and that the refund of the examination fee be ordered. The appeal fee was duly paid.

VIII. In the Statement of Grounds of the appeal, duly filed on 25 July 1983, the appellant contended that no provision of the EPC or the Implementing Regulations ruled out a refund of the examination fee. Article 96 (1) EPC applied in the present case, as did Legal Advice No. 1/1979. Furthermore, it was in the public interest and also that of the EPO that by having the prospect of a refund of the examination fee applicants should be positively encouraged to review their applications when invited to do so and to withdraw those that were likely to be unsuccessful before examination was commenced. There was also a moral justification for a refund: the examination fee was a fee for substantive examination and in the present case there had been no such examination.

IX. In a communication issued on 17 July 1984, the Legal Board of Appeal indicated that there appeared to be difficulties in accepting that Article 96 (1) EPC applied in the case of a Euro-PCT application. Attention was drawn *inter alia* to statements made to the Standing Advisory Committee of the European Patent Office (SACEPO) in 1981, by a representative of Directorate-General 5.

X. In reply to the communication, by letter dated 11 September 1984, the appellant's representative requested to be heard in oral proceedings. After consultation with the representative and also with the representative of the appellant in Case No. J 09/83, in which case the same points of law arose, oral proceedings were appointed for and held on 23 January 1985.

* Official text.

XI. With the agreement of the representatives concerned, the oral proceedings in both cases were consolidated (cf. Rules of Procedure of the Boards of Appeal, Article 9 (2)). After hearing the representatives of both appellants the Board stated that it would reserve its decision in each case and that if it did not find it possible to come to a positive decision in favour of the appellant it would consider submitting a point of law to the Enlarged Board of Appeal. The appellant's representative indicated that he would like the Board to formulate any question to be put to the Enlarged Board of Appeal but that he would appreciate the opportunity of making observations to the Board before the question was submitted.

Reasons for the Decision

1. The appeal complies with Articles 106-108 and Rule 64 EPC and is, therefore, admissible.

2. The question raised in the present case, whether the examination fee may be refunded when a "Euro-PCT" application is withdrawn after receipt of the supplementary European search report, is one which has long been recognised as giving rise to legal difficulty. It has been considered on several occasions by the Legal Service of the European Patent Office and was discussed in 1981 by the Standing Advisory Committee of the European Patent Office (SACEPO), without positive result.

3. Since an early stage in the work of the European Patent Office, it has been the practice to refund the examination fee when a European patent application which is not a "Euro-PCT" application is withdrawn before responsibility for the application has passed from the Receiving Section to an Examining Division. According to the views expressed in Legal Advice No. 1/79 (OJ EPO 1979, 61), this is justified because the purpose behind the provisions of Article 96 (1) EPC is to avoid unnecessary initiation of the examining procedure.

4. Article 96 (1) EPC provides that "if the applicant for a European patent has filed the request for examination before the European search report has been transmitted to him, the European Patent Office shall invite him after the transmission of the report to indicate whether he desires to proceed further with the European patent application." If he does not wish to proceed further, he may simply refrain from answering the invitation within the time limit, so that the application is deemed to be withdrawn pursuant to Article 96 (3) EPC.

5. Rule 51 (1) EPC provides that, in the invitation pursuant to Article 96 (1) EPC, the European Patent Office shall invite the applicant, if he wishes, to comment on the European search report and to amend, where appropriate, the description, claims and drawings.

6. The provisions of Article 96 (1) EPC and Rule 51 (1) EPC clearly operate in the respective interests of applicants, third parties and the European Patent Office by encouraging applicants to review their applications critically and realistically in the light of the European search report, before substantive examination begins. The opportunity given by the Office to obtain a refund of the substantial fee for examination by withdrawing the application at that stage, or allowing it to be deemed to be withdrawn, provides an additional incentive to withdraw cases which are unlikely to succeed.

7. Article 96 (1) EPC and Rule 51 (1) EPC confer rights upon an applicant for a European patent which he otherwise would not enjoy.

The applicant may of his own volition amend the description, claims and drawings after receiving the European search report (Rule 86 (2) EPC). Moreover, since he has the right under Rule 51 (1) EPC to comment on the European search report at that stage, he can expect to receive the Examining Division's response to his comments in the first communication, which can be to his advantage because of his right to submit amendments with his reply to that communication (Rule 86 (3) EPC).

8. As a matter of principle, the applicant for an international application which is deemed to be a European patent application in accordance with the provisions of Article 150 (3) EPC must be entitled to the same rights as any other applicant for a European patent. There can be no discrimination between applicants. Nevertheless, distinctions can properly be made between applicants in different legal situations.

9. In the case of an international application, Article 157 (1) EPC provides *inter alia* that, without prejudice to the provisions of Article 157 (2) to (4) EPC, the international search report, which is drawn up and transmitted to the applicant by the international searching authority under Article 18 PCT, shall take the place of the European search report. Article 19 PCT gives the applicant the opportunity to amend the claims of the international application in the international phase.

In contrast, Article 92 (1) EPC provides for the drawing up and Article 92 (2) EPC provides for transmittal to the applicant of the European search report by the EPO. The invitations required to be given under Article 96 (1) EPC and Rule 51 (1) EPC are sequential to and consequent upon the provisions relating to the drawing up and transmittal of the European search report. Hence, it can be concluded from the context that if those provisions do not apply, then Article 96 (1) EPC and Rule 51 (1) EPC do not apply either.

10. According to Article 16 EPC, the Receiving Section ceases to be responsible for a European patent application when a request for examination has been made or the applicant has indicated under Article 96 (1) EPC that he desires to proceed further with his application. In the case of an international application for which no supplementary European search report has to be drawn up, for the reason given in the previous paragraph, the reference to Article 96 (1) EPC in Article 16 EPC has to be ignored as inapplicable. Therefore, it is correct to say that the Examining Division assumes responsibility for such an international application when the request for examination has been made.

11. The question whether Article 16 EPC applies differently in a case in which a supplementary European search report is required in accordance with Article 157 (2) (a) EPC can only be answered by considering the legal nature of a supplementary European search report. As the Board has already decided in Case J 06/83** (Decision of 25 September 1984), a supplementary European search report has to be considered to be a European search report within the meaning of the EPC for certain purposes and the provisions of Articles 17 and 92 EPC apply to its drawing up and transmittal to the applicant by a Search Division.

12. Bearing in mind the matters considered above in paragraphs 7 to 9, the Board concludes from the language of Article 96 (1) EPC, from its purpose, and from its context in the other provisions of the EPC, that there is every reason to consider that the reference in Article 96 (1) EPC to transmittal of the European search report must be interpreted as including transmittal of a supplementary European search report.

13. It follows that Article 16 EPC applies to its full extent in a case in which a supplementary European search report is transmitted. The making of a request for examination before the supplementary European search report has been transmitted to the applicant does not have the effect of immediately transferring responsibility for the application to the Examining Division. In this respect, the Guidelines for Examination in the European Patent Office Part C-VI, 1.1.3., October 1981, cannot be followed by the Board. Thus, the applicant is in the same legal position as any other applicant who is entitled to receive invitations under Article 96 (1) and Rule 51 (1) EPC.

14. Applying Article 16 EPC in the present case, it is clear that responsibility for the application did not pass from the Receiving Section to the Examining Division at any time. Since the appellant corporation never received the invitations under Article 96 (1) and Rule 51 (1) EPC to which it was entitled, it never had any opportunity to respond.

15. In these circumstances, the decision under appeal must be set aside and the appellant is entitled to a refund of the examination fee.

16. The Legal Board of Appeal considers that as the legal position under the EPC is clear, it is unnecessary to refer any question of law to the Enlarged Board of Appeal for decision.

17. Although the Legal Board of Appeal has decided that, contrary to the previously accepted general opinion, the responsibility for the application did not pass to the Examining Division at any time, the action of the Examining Division in deciding the case in accordance with the prevailing interpretation of the EPC cannot be regarded as a substantial procedural violation within the meaning of Rule 67 EPC such as to justify reimbursement of the appeal fee.

ORDER

For these reasons,

it is decided that:

1. The decision of the Formalities Section of Directorate-General 2 of the European Patent Office dated 18 April 1983 is set aside.
2. The examination fee paid in respect of the European patent application shall be refunded to the appellant.

AGREEMENT BETWEEN THE UNITED STATES PATENT AND TRADEMARK OFFICE AND THE INTERNATIONAL BUREAU OF WIPO

The United States Patent and Trademark Office has notified the International Bureau of WIPO, pursuant to Article 15(2) of the Agreement (published in PCT Gazette No. 02/1978, pages 139 to 145, and No. 03/1978, page 180), of an amendment to Annex A of this Agreement. The amended Annex A reads as follows:

“ANNEX A

COUNTRIES AND LANGUAGES UNDER ARTICLE 3 OF THIS AGREEMENT

The Authority will conduct international searches and prepare international search reports

(i) for the following countries:*

United States of America, Brazil, Barbados

(ii) in the following languages:

English.”

* In the second session of the Preparatory Intergovernmental Committee on the Revision of the Paris Convention for the Protection of Industrial Property, June 29 to July 8, 1977, the Delegation of the United States of America offered the services of its International Searching Authority (the Authority under this Agreement) to all nationals of countries of the western hemisphere party to the PCT on the same conditions these services would be available to its own nationals. This offer stands.

DESIGNATED (OR ELECTED) OFFICES**Finnish Patent Office****Time Limits under PCT Articles 22(2) and 39(1)(a)**

The International Bureau has been notified by the Patent Office of Finland of the withdrawal of its notification excluding, for a transitory period, the modified time limit of 20 months from the priority date under Article 22(2) and the modified time limit of 30 months from the priority date under Article 39(1)(a) (see PCT Gazette No. 25/1984, page 3098). The modified time limits under Articles 22(2) and 39(1)(a) are, according to that notification, compatible with the Finnish Patents Act as from September 1, 1985.

MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION (PCT UNION)

ASSEMBLY

Thirteenth Session
(5th Ordinary)
(Geneva, September 23 to October 1, 1985)

Note*

The Assembly of the International Patent Cooperation Union (PCT Union) held its thirteenth session (5th ordinary) in Geneva from September 23 to October 1, 1985, within the framework of the sixteenth series of meetings of the Governing Bodies of the World Intellectual Property Organization (WIPO) and the Unions administered by WIPO.

Twenty-nine PCT Contracting States were represented at the session: Australia, Austria, Belgium, Brazil, Bulgaria, Cameroon, Democratic People's Republic of Korea, Denmark, Finland, France, Germany (Federal Republic of), Hungary, Italy, Japan, Luxembourg, Madagascar, Monaco, Netherlands, Norway, Republic of Korea, Romania, Senegal, Soviet Union, Sri Lanka, Sudan, Sweden, Switzerland, United Kingdom and United States of America.

A number of other States, of intergovernmental organizations and of international non-governmental organizations participated in the session as observers.

New amounts of fees set out in the Schedule of Fees annexed to the PCT Regulations were fixed by the Assembly as from January 1, 1986. They are, in Swiss Francs, approximately 8% higher than the fees applicable in 1985. The amended Schedule of Fees appears on page 3306. The equivalent amounts in other currencies, established on the basis of the exchange rates applicable in Switzerland on September 30, 1985, are published on page 3307. The Assembly also decided that no further increase in the fees in Swiss Francs should be made for 1987.

Moreover, the Assembly:

- decided that the PCT Gazette would continue to be published in an English-language edition and a French-language edition, the two editions being separate;

- noted that the sales price of the PCT pamphlets would be 11 Swiss francs per copy for 1986 and 1987;

- decided that the present format of the PCT pamphlets should not be changed, at least as regards the printing of drawings and the number of pages of the international application which should appear on each page of the pamphlet;

- agreed to postpone any decision concerning the establishment of the Executive Committee until any State member of the PCT Union or the Director General proposed that the matter be reconsidered;

- decided that all PCT Contracting States--in addition, in the case of the Committee for Technical Cooperation, to the *ex officio* members according to Article 56(2)(b) of the PCT--would continue to be members of the Committee for Technical Cooperation and the Committee for Technical Assistance until any State member of the PCT Union or the Director General proposed that the matter be reconsidered.

* This Note was prepared by the International Bureau.

NOTICES AND INFORMATION OF A GENERAL CHARACTER

DESIGNATED (OR ELECTED) OFFICES

Japanese Patent Office

Time limits under PCT Articles 22(2) and 39(1)(a)

The International Bureau has been notified by the **Japanese Patent Office** of the withdrawal of its notification excluding, for a transitory period, the modified time limit of 20 months from the priority date under Article 22(2) and the modified time limit of 30 months from the priority date under Article 39(1)(a) (see PCT Gazette No. 25/1984, page 3098). The modified time limits under Articles 22(2) and 39(1)(a) are, according to that notification, compatible with the Japanese Patent Law as from November 1, 1985. However, it is recalled that, even where Article 39(1) applies, the translation of the international application into Japanese must always be furnished within 20 months from the priority date.

Thus, all notifications excluding, for a transitory period, the modified time limits under Articles 22(2) and 39(1)(a) have been withdrawn.

Reduction of Fees in the National Phase

The International Bureau has been informed by the **Japanese Patent Office** that, as from November 1, 1985, the fee for request for examination payable to the Japanese Patent Office is as follows:

	Patents	Utility Models
	(Currency: Yen)	
Where the international search report has been established		
- by the Japanese Patent Office (80% reduction)	6,600, plus 1,100 per invention	4,200
- by an International Searching Authority other than the Japanese Patent Office (20% reduction)	26,000, plus 4,200 per invention	17,000

Requirements Concerning the Entry into the National Phase

The **Japanese Patent Office** has also informed the International Bureau that, as from November 1, 1985:

- (i) the translation of the international application into Japanese no longer needs to contain the request;
- (ii) a copy of the drawings is no longer required to be furnished together with the translation of the international application into Japanese (see, however, PCT Rule 49.5(d) for the case where any drawing contains text matter);
- (iii) as regards the requirements referred to in PCT Rule 51bis.1(a)(vi) (evidence concerning exceptions to lack of novelty) and in PCT Rule 51bis.1(b)(i) (representation by an agent), another opportunity of fulfilling those requirements is given to the applicant even after the expiration of the time limit applicable under PCT Article 22 or 39(1).
